

Calculate Angles

1a. Identify the triangle which has a right angle.

VF

Calculate Angles

1b. Identify the triangle which has a right angle.

VF

2a. What is the missing angle?

VF

2b. What is the missing angle?

VF

3a. What is the missing angle?

VF

3b. What is the missing angle?

VF

4a. True or false?

70° and 30° is equal to a right angle.

VF

4b. True or false?

110° and 70° is equal to a straight line.

VF

Calculate Angles

5a. Identify the triangle which has a right angle.

VF

Calculate Angles

5b. Identify the triangle which has a right angle.

VF

6a. What is the missing angle?

VF

6b. What is the missing angle?

VF

7a. What is the missing angle?

VF

7b. What is the missing angle?

VF

8a. True or false?

75° and 35° and 80° is equal to a straight line.

VF

8b. True or false?

25° and 45° and 290° is equal to angles around a point?

VF

Calculate Angles

9a. Identify the shape or shapes which have a right angle.

VF

Calculate Angles

9b. Identify the shape or shapes which have a right angle.

VF

10a. What is the missing angle?

VF

10b. What is the missing angle?

VF

11a. What is the missing angle?

VF

11b. What is the missing angle?

VF

12a. True or false?

136° and 56° and 158° is equal to a full turn.

VF

12b. True or false?

79° and 126° and 155° is equal to a full turn.
